

# AKISYAH MANAGEMENT SYSTEM

- How To Run The Project on a Local Machine:

- 1) Install **Node.js** From Browser(Google , Morzilla etc.)
- 2) Open **Vs code**
- 3) Open Project Parcel management system ( it contains two folders Backend and frontend2)
- 4) Open Terminal
- 5) Run Command **cd Backend**
- 6) Run **npm start** ( it would start the backend)
- 7) Close the terminal.
- 8) Open the terminal Again.
- 9) Run Command **cd frontend2.**
- 10) Run Command **npm start** ( it would start the front on the local host).
